

## Operator at Gold Mine Processing Plant [REF: PPOPER]

### JOB DESCRIPTION

<b>Position</b>	<i>Operator</i>	<b>Rotation</b>	<i>4 weeks on/4 weeks off</i>
<b>Location</b>	<i>Nalunaq Mine Processing Plant, Greenland</i>	<b>Type</b>	<i>Full-time, Rotation Basis</i>

### COMPANY VALUES

- Leading through professionalism
- Innovative and agile
- Collaborative and caring
- Long term perspective
- Execute and deliver

### OVERVIEW

We are seeking a skilled and motivated Operator, preferably Greenlandic, to join our team at Nalunaq Mine Processing Plant. This is a rotational position based in a remote location. The Operator will play a crucial role in ensuring the efficient and safe operation of the Processing Plant equipment, contributing to the overall productivity and success of the mine.

### MAIN RESPONSIBILITIES

- Operate and monitor Processing Plant equipment, including crushers, conveyors, grinding mills, gold room, and other plant machinery.
- Maintain optimal performance levels of equipment by adjusting controls, monitoring system alarms, and resolving operational issues.
- Conduct routine checks and inspections to ensure that all plant machinery is functioning within set parameters.
- Monitor and regulate material flow and processing rates to achieve maximum production output and efficiency.
- Report any mechanical or operational issues to the maintenance and technical teams to minimize downtime.
- Perform basic troubleshooting and minor adjustments to equipment as needed.
- Assist in start-up and shutdown procedures for the plant and ensure safe operations during these times.
- Adhere to all safety protocols, ensuring the safe handling of chemicals and materials involved in the processing.

- Keep accurate logs of equipment operation, production levels, and any incidents or irregularities that occur during the shift.
- Assist with routine maintenance tasks and cleaning of processing equipment as directed.
- Collaborate with other departments such as maintenance, electrical, and technical teams to ensure the smooth running of the plant.

SKILLS AND COMPETENCIES	ESSENTIAL	DESIRABLE
• Problem-solving skills with the capacity to respond to operational challenges quickly and effectively.	✓	
• Ability to monitor multiple processes simultaneously.	✓	
• Strong attention to detail and a commitment to safety.	✓	
• Ability to work independently with minimal supervision.	✓	
• Flexibility to work in a remote, rotational setting.	✓	
• Good communication skills in English and/or Greenlandic.	✓	
• Good teamwork skills, with the ability to report effectively and work with maintenance and technical teams.	✓	

### PHYSICAL REQUIREMENTS

- Must be physically capable of performing manual labour, including lifting heavy equipment and tools.
- Ability to work in extreme weather conditions and rugged environments.
- Physically capable of handling long hours, standing for extended periods, and performing manual tasks as required.

### APPLICATION PROCESS

Interested candidates should submit their CV, a copy of their Greenlandic electrical ticket, and references to [recruitment@amaroqminerals.com](mailto:recruitment@amaroqminerals.com).

**NOTE:** The company may expect you to undertake other tasks outside of this job description. This job description is not exhaustive and may be updated from time to time.
