COMPARISON

ESG RATING DISTRIBUTION

SHORT SUMMARY OF RESULTS

Amaroq receives a good score in this ESG rating by Reitun, and comes out with 70 points, an improvement of two points since the previous assessment, and advancing to category B2 from category B3. Amaroq’s forward-looking vision prioritizes operating its mines in conformity with the highest standards, with 2024 marking the first year of year-round operations. As of now, mid 2025, the project is at phase 2 (operational). The operational phase is expected to last 10 years. Amaroq is obligated to adhere to strict legislation concerning the environmental and social impact of its mining activities and monitors and analyses these impacts in a comprehensive manner in compliance with the relevant regulations. Amaroq is not only committed to compliance with existing legislation but also strives to exceed these requirements and has demonstrated a clear vision regarding climate-related investments as well as their impact on Greenlandic society, even after Amaroq’s operations has finished. The rating assessment takes into account Amaroq’s established framework and assumes that the existing processes and frameworks will effectively manage the challenges associated with increased operations. In the event of a different outcome, it could influence future ESG rating assessments.

Amaroq has already begun collecting ESG-related data and plans to further strengthen these efforts in the coming years. The company aims to increase its sustainability disclosures by publishing its first sustainability report in 2025, taking a step towards greater transparency. The CEO takes direct responsibility for the company’s sustainability initiatives and there is a clear commitment to continue to incorporate sustainability considerations into Amaroq’s operations. Amaroq meets most of the requirements in this assessment in terms of the board’s operations, where an opportunity lies in achieving a balanced gender ratio on the board. The majority of board members are independent; however, it’s worth noting that the CEO also serves as a board member but according to Amaroq, a deviation from the guidelines was approved by Nasdaq Exchange. Ethical conduct is an important factor for the mining sector, and Amaroq follows a Code of Conduct which all employees are required to sign. Whistleblower protection and confidential reporting procedure are in place. Amaroq has adopted a Supplier Code of Conduct and has identified risks in the first tier of suppliers in its supply chain. The company is working towards establishing a more formal ESG assessment process as it will be essential for the company to continue to prioritize having a responsible value chain moving forward. Amaroq has continued to strengthen its framework to promote a safety-conscious and inclusive workplace culture. The company has taken concrete steps to improve employee retention and has placed greater emphasis on cultural awareness and mutual understanding among employees. In addition, Amaroq continues to offer training and development opportunities to workers and students in Greenland, supporting skills development and fostering job creation. This assessment regards Amaroq’s product portfolio (gold and minerals) to be positive overall in terms of both environmental and social factors. Positive outlook is projected for the company’s sustainability performance.

COMPARISON WITH DOMESTIC ISSUERS

Amaroq Minerals is below average in comparison with other domestic issuers, currently about 45. The average overall score on the market is 73 points out of 100 possible, category B2.

Disclaimer

For the purposes of this analysis and ESG rating, it has been assumed that the materials and information to which Reitun has had access are in accordance with the facts. Where Reitun has received photocopies of documents, it is assumed that they correspond with the originals of the documents in question and that no subsequent additions or changes have been made to them. It is also assumed that all signatures on documents and agreements to which Reitun has had access are correct and that they are binding for the company..

The opinions and projections set forth here are based on the general information, and possibly on confidential information, which Reitun has had in its possession at the time of compilation of the rating. The principal sources used are annual financial statements and various materials from the party under examination and other available official information that has been published in the media and in other contexts which the company considers reliable. However, Reitun cannot be held responsible for the reliability or accuracy of this information and accepts no liability for the reliability of the sources of the information used. Data set out in the above discussion appears for the purpose of information only and should not be viewed as an offer of any sort and should not be taken as constituting advice concerning investments in financial instruments. Investors are urged to obtain independent guidance from their own advisors before investing in financial instruments, e.g. as regards their legal standing and tax position. Reitun and its employees can accept no responsibility for transactions based on the information and opinions set forth above.

While particular care has been taken to ensure that the information above is correct and accurate at the time of writing, Reitun and its employees can accept no responsibility for possible errors. The evaluation of this information reflects Reitun's opinions on the date of publication, but these opinions may change without notice. Neither Reitun nor its employees can be held responsible for damage or loss, direct or indirect, resulting from information found in this rating, or for the dissemination of such information.

In particular, attention is drawn to the fact that estimates and forward-looking statements may change without warning in either a positive or a negative way and are subject to external uncertainties and variables that are generally beyond Reitun's control. Reitun and its employees therefore cannot accept responsibility if the ESG rating of an individual issuer that has been assessed and given a rating by the company subsequently changes. Reitun cannot undertake to change the information published in this report if the premises on which it is based change or if it comes to light that it is incorrect or inaccurate.

Reitun, its employees, directors or other parties connected with Reitun may have interests at stake regarding particular companies addressed in its analyses, valuation reports and other publications at any given time. These interests may take various forms, e.g. as shareholders or advisors, or interests connected with other services provided. Issuers of securities that are valued by Reitun pay the company for this service. Valuations and analyses are nevertheless prepared independently by Reitun.
